

**FREE
FLU SHOT**
AVAILABLE
FOR PEOPLE 65 AND OVER

Flu in Adults Age 65 Years and Older

Adults **65+** are at increased risk of flu-related complications

Annual vaccination is the best way to protect yourself against the flu

Vaccines are safe and effective and reduce the risk of flu and related complications

Immune systems decline as adults age. Certain vaccines are available to help boost immune response, specifically in adults 65+:

High-dose vaccines contain **4X more** antigen than standard-dose vaccines

Adjuvanted flu vaccines contain an ingredient that helps create a **stronger immune response**
